

### Funding disclosure, 2021 to 2023

Since January 1, 2021, Swire's research has received funding from the following sources. This research has included support for Georgia Tech research faculty member DeBrae Kennedy-Mayo, as well as undergraduate and graduate research assistants. The National Science Foundation funding is for a defined project. All other research funding has been unrestricted – not dependent on producing any particular work or conclusion. None of the research is subject to prior review or approval by the entity providing funding.
